Why Scouting for Food?

Worldwide hunger statistics are staggering, but for the country producing the most food in the world, it is alarming to see how many in our country are food insecure.

According to Gallup, California is one of the states most adversely affected by food insecurity in the United States. And according to a study by the Robert Wood Johnson Foundation, of 57 California counties studied, over 10 with the highest rate of food insecurity are located in the Golden Empire Council region. In fact, Placer County is fourth on that list.

Scouting for Food makes a difference. The project is simple, but the impact is huge!
